## Education

**Federal University of ABC (UFABC)**, Santo Andre, Brazil — Jun 2024 –
Bachelor's degree – Computer Science — GPA: /4.0

## Professional Summary

Computer Science undergraduate student at UFABC, with research experience in machine learning, time series forecasting and symbolic regression. Member of a competitive programming team participating in ICPC contests, with a strong interest in algorithms, data science, and machine learning.

## Competitive Programming

- ICPC South America – Brazil First Phase, 2026 — 377/923 (Certificate)

## Scientific Research

**Scientometric Analysis of Time Series: Modeling and Forecasting with Neural Networks of Brazilian Academic Data.** Sep 2024 – Nov 2025
*Santo Andre, Brazil*
*under Prof. Jesús Mena-Chalco*

This Scientific Initiation project is part of the PDPD program (Researching from the First Day) at UFABC, which aims to promote participation in academic research for newly arrived students at the university. My work focuses on building Recurrent Neural Network (RNN) models, using Brazil scientific output as a database. The project's goal is to create a time series that consolidates academic research data, enabling the prediction of future trends in scientific production.

**Awarded an Honorable Mention in the Communication and Information track** (Certificate)

**Evaluation of the Performance of Equality Graph-Based Algorithms for Symbolic Regression in Comparison to Other Evolutionary Approaches. CNPq.** Mar. 2026 – Mar. 2027
*Santo Andre, Brazil*
*under Prof. Fabrício Olivetti de França*

Research on symbolic regression and interpretable machine learning, focusing on the discovery of mathematical expressions from data. The project evaluates equivalence graph-based approaches and equality saturation techniques, comparing their performance against evolutionary symbolic regression algorithms across different benchmark regression problems.

## Selected Projects

## Skills

| | |
|---|---|
| Programming Languages | Python, R, SQL (PostgreSQL), C++, JavaScript |
| Machine Learning & Data | Pandas, NumPy, PyTorch, MatplotLib |
| Tools & Infrastructure | Git, Linux, Docker (basic), Jupyter Notebook, PostgreSQL, BigQuery (basic) |
| Natural Languages | Portuguese (Native), English (B2) |
